

In the Spotlight...

Autobahn Service is the Berkshires premier import repair shop. They offer service and repair on most modern imports but their passion is German engineering especially VW, Audi and BMW. They offer full service, repair, diagnosis and APR Tuning. In addition to being a tire dealer they are also a TireRack installer and they are more than happy to offer the convenience of having those tires delivered to us. Autobahn Service has the latest diagnostic equipment and offers dealer service at a fraction of the price.

Our Background Hailing from Ireland, Dominic's forte is figuring out and understanding newer German cars. Being a car buff at heart no challenge is too great. In his personal fleet he has a 2012 Jetta GLI tuned to APR Stage 1, an E30 M3 with a 380HP Euro S50B32 transplant in progress, a Euro 635CSI with a giant turbo upgrade on a Kormann motor, and a venerable '83 GTI also undergoing restoration. He has a hand in all the work that come through the door and is always available to discuss your concerns or even your next purchase.

The Team Paul Marcel is our veteran VW and Audi technician. Dedicating most of his professional life to working on these types of cars, he has vast experience on Mercedes, Porsche, VW, Audi and BMW. DJ Schneider is also a longtime VW mechanic with a wealth of dealer and independent experience. Connor Vosburgh is the newest addition to the shop. Recently graduated from the UTI Mercedes program, Connor has a passion for all things German and has several projects on the go. On the phone and here to make your appointments we have Tracy Stoddard.
